## PROJECT DESCRIPTION

The SUNCARE Pharmacy Management System is an interactive Excel dashboard developed to monitor and analyze pharmacy sales and purchase operations. It provides insights into sales, purchases, GST, product performance, category-wise sales, quarterly performance and monthly sales trends through KPI cards, charts, Pivot Tables and interactive slicers.

## OBJECTIVES

- ✓ To monitor overall pharmacy sales and purchase.
- ✓ To monitor and analyze GST on pharmacy sales and purchases for accurate tax tracking and reporting.
- ✓ To analyze pharmacy profit from sales and purchases.
- ✓ To track medicine stock levels and availability.
- To analyze monthly sales trends and pharmacy performance.

## Section 1 - KPI Cards

| KPI Name                     | Format         | Period    | Calculation / Business Rule                                                       |
|------------------------------|----------------|-----------|-----------------------------------------------------------------------------------|
| Total Sales Revenue          | Currency (₹)   | MTD / YTD | Sum of invoice totals from sales transactions in current month and financial year |
| Total Purchase               | Currency (₹)   | MTD / YTD | Sum of GRN purchase values in current month and financial year                    |
| Total GST Paid to Government | Currency (₹)   | MTD       | Sum of sales input GST – Sum of GST on all purchase                               |
| Gross Profit                 | Currency (₹)   | MTD / YTD | Total Sales – Total Purchase – GST Paid                                           |
| Gross Profit Margin          | Percentage (%) | MTD / YTD | $(\text{Gross Profit} \div \text{Total Sales Revenue}) \times 100$                |

## Section 2 - Patient Analytics

| Chart Title             | Measures / Dimensions                                                  | Chart Type | Notes                                                                |
|-------------------------|------------------------------------------------------------------------|------------|----------------------------------------------------------------------|
| Monthly Sales Trend     | Total Sales by month wise on selected year                             | Line       | Months in X Axis should be supported Indian FY format (Apr – Mar)    |
| Sales By Category       | Revenue % share by product category                                    | Donut      | Show top 3 categories; group remainder as 'Others'; display % labels |
| Quarterly Sales         | Comparison of total sales income for each quarter in the selected year | Bar        | Show all 4 quarter sales comparison                                  |
| Top 5 Products By Sales | Product name vs Sales ₹ for Top 5 Products                             | Column     | iSort descending; show value labels at bar end                       |
